

## **Internship opening at the Cikananga Wildlife Rescue Center, Java, Indonesia**

### **Initiate Snail Breeding for Otters at Cikananga**

The Cikananga Wildlife Rescue Center takes care of on average 350 wild animals that are confiscated, rescued or evacuated from the wildlife trade or conflict situations. Cikananga has a program dedicated to otters in which the ecology of otters in their natural habitat is studied and facilitate rescue and rehabilitation with the goal to successfully release them in protected reserves.

At the moment we have limited variation in their food, with this internship you will be making a difference in this. First a detailed plan will be made by you after which the snail breeding will be initiated. Depending on the length of your stay here at the center you will also do some important behavioral monitoring when our otters have regular access to snails. All activities will all be done with supervision of Cikananga staff who are Bahasa Indonesia and / or English and / or Dutch speaking.

Are you...

- Motivated, independent and flexible
- Learn about the biology of snails and at the same time make a difference for the otters in Cikananga and
- Able to report and present the results at the end of your internship to the team at Cikananga
- Set for an insightful and memorable experience in Indonesia

We are open to either Vocational, Bachelor or Master students for conservation, behavior, ecology of similar studies with a genuine feeling for animal welfare. We have extensive experience with tutoring students and we hope you can help us improve the welfare of especially the otters at our center.
